

design: Andreas Störiko

moin **action-tables**

Materials and colours

The steel precision tubes of the ***moin*** action-tables are always matched to the matt Fenix-NTM laminates of the panels. There are four colours to choose from with identical coating on both sides for the table-top: Bianco Kos, Blue Fes, Grigio Londra and Nero Ingo.

The base can be ordered Tiger-powder-coated with fine-matt texture in matching colour throughout or alternatively polished.

ROOMTOOL uses only materials of highest quality for the table tops made from Birch plywood with waxed edges. The latter are haptic pleasantly rounded at the top and bottom. The round table tops are finished with recess for docking or without at the same price. The table top is E1 certified.

A nylon hook under the table allows the hanging of bags or organizing sockets. A hand friendly expander rubber band helps to quickly connect and adjust the tables during assembly until the rollers are locked.

Castors

In the standard version the armchair is equipped with soft allround ‚Move‘ double castors equipped with no-noise pen from Gross and Froehlich in black. All four castors have Delta parking-brakes. Special variants are available on request.

Extras

The standing-height pedestal tables are equipped as standard with fine adjustment of the fourth wheel. They are equipped with a knurled screw to achieve optimal stability and to avoid any possible wobble. Optionally, the tube can be ordered with cable feed-through at a neutral price.

Security

The tables are currently GS-certified by TÜV Rheinland / LGA Products.
